

Vertiv™ Liebert® GXT RT+ UPS

1000 - 3000 VA 230 V

Essential, Affordable UPS for
High Performance Protection

About Vertiv™

Vertiv brings together hardware, software, analytics and ongoing services to ensure its customers' vital applications run continuously, perform optimally and grow with their business needs. Vertiv solves the most important challenges facing today's data centers, communication networks and commercial and industrial facilities with a portfolio of power, cooling, and IT infrastructure solutions and services that extends from the cloud to the edge of the network. Headquartered in Columbus, Ohio, USA, Vertiv employs around 20,000 people and does business in more than 130 countries. For more information, and for the latest news and content from Vertiv, visit [Vertiv.com](https://www.vertiv.com).

Essential and Affordable Uninterruptible Power Supply (UPS) for High Performance Protection

The Vertiv™ Liebert® GXT RT+ UPS is an online double conversion solution which offers power protection in an affordable, efficient system with deployment and operation flexibility.

The high 0.9 power factor of the single-phase Liebert GXT RT+ enables continuous, reliable power to more connected devices from a wide range of input voltages while being energy efficient and, delivering maximum value.

The ECO mode of operation for this already affordable UPS also drives energy cost savings for a compelling total cost of ownership (TCO).

Being able to mount the Liebert GXT RT+ in a rack or tower is a convenience that adds to the value story as does the capability of the UPS to utilize up to six connected external battery cabinets for scalable runtimes.

In addition to the extended runtime, having multiple monitoring options makes this compact UPS ideal for delivering best-in-class power protection to equipment deployed at the edge of networks or in space-constrained facilities.

What's in the box?

- UPS
- Rack Mounting Kit
- USB Cable
- Quick Installation Guide
- Safety Instructions
- Input and Output Power Cables (Based on Power Rating)
- Plastic Tower Mounting Feet
- Rack Ears, Screws and Hardware

Liebert GXT RT+ Features

- Online technology with two stages of power conversion
- Output power factor higher than majority of comparable competitor models
- Flexible rack/tower form factor
- External battery cabinet compatibility
- User-friendly liquid crystal display (LCD)
- High efficiency ECO mode
- Smart battery charger design
- Wide input voltage operation (120-300V AC)

Vertiv™ Liebert® GXT RT+ UPS Features and Benefits

Compact, flexible form factor

Option of rack or tower mounting supports simplified UPS selection and deployment.

External battery cabinet capability

Connected modules enable scalable runtime during failure of main utility power.

User-friendly interface

Intuitive LCD provides complete UPS status and configuration information at a glance.

High efficiency ECO mode

Configurable operation mode for up to 95% efficiency helps to achieve energy savings and a lower TCO.

Monitoring compatibility

Network interface or serial connections enable remote access to UPS for power consumption monitoring and configuration of alert notification parameters.

High power factor (0.9)

More usable power enables more connected loads for space and cost savings.

Note: Front panel is the same for all power ratings while rear panels will vary. Shown here is a 3 kVA model.

Accessories

Optional Connectivity Cards

Webcards/SNMP devices enable direct connection to the internet and use of a standard web browser for power monitoring and management including controlled shutdown for multiple computer systems. Volt free contact (VFC) cards are available for applications requiring this type of monitoring.

External Battery Modules

Modules connected to new or existing deployments ensure reliable power and protection and enable scalable runtime for support during extended power outage situations.

Liebert® MicroPOD Maintenance Bypass

A 2U rack-mounted installation, available in several receptacle combinations, allows manual transfer of connected equipment to utility power ensuring network availability and business continuity during scheduled service or UPS replacement.

Key Applications

IT

- Servers
- Networking equipment
- Data storage

Finance

- Branch offices
- Closed-circuit televisions and data protection
- ATMs

Telecom

- 5G mobile stations
- Access and “last mile”
- Small control rooms

Industrial

- Manufacturing sites
- Control equipment and programmable logic controllers (PLCs)
- Data and networking equipment

Education

- Networking closets
- Networking equipment
- Office protection

Government

- Distributed offices
- Closed-circuit television (CCTV) and data protection
- Small server and storage rooms

Retail

- Several point of sale systems
- Networking and wiring closets
- Security and voice over internet protocol (VoIP) telephony

Edge

- Distributed cloud services
- Content providers
- Sensors and data stations
